## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-15, 17-32, and 34 allowed. Renumbered 1-32 respectively. The following is an examiner's statement of reasons for allowance:
2. The prior art of record does not teach, among other features, *an always connected state in which a feature may be accessed even when a call is not in progress and being associated with a predetermined node-specific, speech-based grammar for the respective node.*
3. The prior arts of record teaches always connected states, however they 'push' features to a device and therefore so can't meet the limitation using spoken utterances from a user to access features like in Vysotsky and Osder. Voice command patents(e.g Voice browsers like in Rhie) establishes a call in order to access features and therefore can't meet all the limitations. In addition, the combination of the above are not obvious to modify.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
